

FY07 Environmental Quality Incentives Program (EQIP) Comprehensive Nutrient Management Plan (CNMP) Payment Schedule - BEEF

Summary for F07EQIP CNMP Initiative													
Base Farm number of animals	< 100	100 to 500	> 500										
	Beef Cattle	Beef Cattle	Beef Cattle										
NEW Plan/ Operation/ Expansion for 50% animal numbers													
Animal Unit CNMP	\$3,330	\$4,160	\$5,410										
Acre CNMP	\$3,420	\$4,270	\$5,550										
Acre CNMP - Export	\$1,710	\$2,135	\$2,775										
Definitions													
New Plan: A CNMP for an operation that did not previously have a CNMP.													
New Operation: A newly constructed livestock operation with a waste management system.													
Existing operation with 50% expansion: A livestock operation with a CNMP that increases by 50% or more of the original animal numbers addressed by the existing CNMP.													
Animal Unit CNMP: The planning activities for the manure and waste handling components of the system. This will be engineering related information.													
Acre CNMP: The planning activities for the land treatment practices and nutrient management aspects of the system.													
Acre CNMP - Export: A livestock operation that exports 50% or more of the manure or organic products (including mortalities).													
Export: Manure or organic material that is transferred to another owner with documentation in written record of transfer.													
Base Farm number of animals	< 100	100 to 500	> 500										
	Beef Cattle	Beef Cattle	Beef Cattle										
Existing Plan Revision for operations that have a plan that is revised. Includes expansion up to 50% of animal numbers													
Animal Unit CNMP	\$2,330	\$2,920	\$3,790										
Acre CNMP	\$2,390	\$2,990	\$3,890										
Acre CNMP - Export	\$1,195	\$1,495	\$1,945										
Definitions													
Existing operation with less than 50% expansion: A livestock operation with a CNMP that increases by less than 50% of the original animal numbers addressed by the existing CNMP.													
Existing Plan Revision: A livestock operation with a CNMP that needs to be revised due to changes in the operation not addressed by the existing CNMP.													
Animal Unit CNMP: The planning activities for the manure and waste handling components of the system. This will be engineering related information.													
Acre CNMP: The planning activities for the land treatment practices and nutrient management aspects of the system.													
Acre CNMP - Export: A livestock operation that exports 50% or more of the manure or organic products (including mortalities).													
Export: Manure or organic material that is transferred to another owner with documentation in written record of transfer.													
Instructions for Use													
The activities associated with the development of a CNMP have been divided into 2 categories													
Animal Unit CNMP and Acres CNMP (Export CNMP is an option for Acres). The Total Plan includes both categories.													
Step 1: Locate the Base Farm number of animals that reflects the species and number of animals for the waste management system.													
Step 2: Follow column to row that corresponds to proper category. Can not include both Acre CNMP and Acre CNMP - Export.													
Step 3: Select maximum payment for plan. A total plan may be the sum of the Animal Unit CNMP and Acre CNMP payments. Export CNMP is an option instead of Acre CNMP.
